He says that a few nights since he went to sleep thinking of the purchase of a horse. Finally, he began to dream of them. He saw vast prairies covered with droves of wild horses—green pastures where they grazed in numbers—and sudwhere they grazed in numbers—and sudwhere they grazed himself a horse. He was a very fine one, too-fine, glossy house, he observed to his companion: hair, beautiful limbs, stately and proud as a racer. People came to look at him, and greatly admired his trim proportions and elegant appearance. He tossed his roan is over yonder!" head in the air, would kick up, and then paw the ground. Finally he concluded he would neigh, but, do his utmost, he could only bray. He remembers a gentleman standing near by said :

"There is some mule in that horse. This made him mad. He would show the critical citizen he was mistaken. So he kicked up again, pawed the ground. his rifle with the air of a man resisting a tossed up his head, and did his best. But again the same old bray. The people laughed and said, "what a curious horse."

This was more than the patience of a horse could endure, and he determined that if he couldn't neigh, he could kick, and he let fly his heels at the crowd. He "I won't tell," said Sai knew he hit them, for he heard them cry out, He kicked the harder, and the or no tell. The horse is too nigh. If he screams grew louder. Persevering in his was fifty rods off instead of twelve, so laudable revenge, his heels flew like the shafts of an engine, and he knew that him for a deer, I'd fly. KINGSTON, October 1.-Jamaica and Demerara continue to receive large additions to their laboring population, by frequent arrivals of ships with coolies from India. Four vessels with coolies are now on their way from Calcutta to these colonies, and, at the latest advices from that place, several more were about being taken capable of conveying 400 or 500 emigrants each. In Jamaica the coolies are giving great satisfaction to the planters, working steadily, and demeaning them-selves in an orderly and peaceable man-cent victim of his ire, lay with broken ner; but in Western Demerara these peo- stock on the bottom of the wagon. "I didn't do anything else."

"The devil!" grouned the old hunter.

Moving houses has been reduced to a perfect system in Boston, where at present they are moving a large freestone hotel to make room for the widening of Tremont street. A sort of railroad has been constructed for it. The entire basement has been hid bere, the foundations slightly raised, and large numbers of small iron rollers, inserted under them, and these rollers will move upon a stout foundation well with straps of iron bound to its top. The moving force is some sixty or esventy jack screws, turned by human power, and capable of moving ten hundred thousand tons, which is the weight of the building. The journey was commenced on the morning of August 21st, and at noon the edifice had been moved ninascen inches. In the mean-time the occupants of the building are employed in their usual symmton. This foul corruption, which genders in the blood, depresses the energies of life, so that scrofulous constitutions not only suffer from scrofulous complaints, but they have far less power to withstand the attacks of other diseases; consequently vast numbers perish by disorders which, although not scrofulous in their nature, are still rendered fatal by this taint in the system. Most of the consumption which decimates the human family has its origin directly in this scrofulous contamination; and many destructive diseases of the liver, kidneys, brain, and, indeed, of all the organs, arise from or and, indeed, of all the organs, arise from or

are aggravated by the same cause.

One quarter of all our people are scrofulous; their persons are invaded by this lurking infection, and their health is undermined by it. To cleanse it from the system we must renovate the blood by an alterative medicine, and in-vigorate it by healthy food and exercise. Such a medicine we supply in

It is combined from the most active remedials that have been discovered for the expurgation of this foul disorder from the blood, and the rescae of the system from its destructive consequences. Hence it should be employed for the cure of not only Scrofula, but also those other affections which arise from it, such as Expurive and Skin Diseases, St. Anthony's Firm, Rose, or Ervstpreas, Pinples, Postules, Blairs and Boils, Tunous, Terren BLOTCHES, BLAINS and BOILS, TUMORS, TETTER and SALT RHEUM, SCALD HEAD, RINGWORM, RHEUMATISM, SYPHELITIC and MERCURIAL DIS-BASES, DROPSY, DYSPRESIA, DEBILITY, and, indeed, ALL COMPLAINTS ARISING FROM VITIAindeed, ALL COMPLAINTS ARISING PROS. of complaints, but also the cheapest. The large quantity we supply for a dollar brings it within the reach of every body; and in bilious districts, where FEVER AND AGUE prevails, every body should have it and use it freely both for eure and protection. A great superiority of this remedy over any other ever discovered for the speedy and certain cure of Intermittents is that it contains no Quinine or mineral, consequently it produces no quinism or other injurious effects whatever upon the constitution. Those cured by it are left as healthy as if they had never had the disease.

Fever and Ague is not alone the consequence of the miasmatic poison. A great variety of disorders arise from its irritation, among which are Neuralyia, Rheumatism, Goid, Headache, Blindness, Toothache, Earache, Catarrh, Asthma, Palpitation, Painful Affection of the Spleen, Hysterics, Pain in the Bowels, Cohe, Paralysis and Derangement of the Stomach, all of which, when originating in this cause, put on the intermittent type, or become periodical. This "Cure" expels the poison from the blood, and consequently cures them all alike. It is an invaluable protection to immigrants and persons travelling or temporarily residing in the malarious districts. If taken occasionally or daily while exposed to the infection, that will be exceeded from the system, and cannot that will be exceeded from the system, and cannot that will be exceeded from the system, and cannot sionally or daily while exposed to the infection, that will be excreted from the system, and cannot accumulate in sufficient quantity to ripen into disease. Hence it is even more valuable for protection than cure, and few will ever suffer from Intermittents if they avail themselves of the protection this remedy affords.

We are enabled here to offer the community a remedy which, while it cures the above complaints with certainty, is still perfectly harmless in any quantity. Such a remedy is invaluable in districts where these afflicting disorders prevail. This "Cure" expels the miasmatic poison of Feven and Ague from the system, and prevents the development of the disease, if taken on the first approach of its premonitory symptoms. It is not only the best remedy ever yet discovered for this class of complaints, but also the cheapent. The large of complaints, but also the cheapest. The large
